Dear Parents/Carers,

Chicken Pox, Measles and Shingles

One of our children has just finished receiving medical treatment. Although the treatment has ended they are still at risk of becoming very unwell if they are exposed to any infectious disease. They are especially vulnerable to measles, chicken pox or shingles.

If they are exposed to any of these they will need to be given treatment as soon as possible. If your child is suspected of having any infectious disease please let us know immediately.

Your child is not at any risk whatsoever from this situation. However, the health and well-being of our pupil who is at risk, depends on the cooperation of all other parents and carers.

We thank you for your cooperation with this important matter.

Ed Seeley
Headteacher
