

Spring Topic 1

The first topic we will be learning about in 2016 is the
Ancient Egyptians.

English

All children have individual targets that they will be working on and in class we will be developing the following skills:

- The detail of characters, setting and plots
- Use conjunctions, adverbs and prepositions to explain time, cause and place
- Reading and writing poetry

Maths

Along with continuing our times table practice every day, we will be also be spending lots of time securing our multiplication and division skills.

Other Subjects

In Design and Technology we will be exploring the use of hydraulics and making our own sarcophagus where we will use hydraulics to make the mummy pop out!

To support this in science, we will be learning about magnets and force and in computing we will be using software to graphically model some designs.

In RE we will be discussing different religions' perception of what happens when people die (linking this in with our Egyptian topic). We will teach this sensitively and allow children to ask lots of questions, but please let us know if your child may struggle with this topic.
